Paramedic

1000 Hours | Tuition $ 7,380.87| Books $ 1,364.48 | Supplies $ 430.00| Fees & Testing $ 324.65| Total Cost $ 9,500.00

Prices are subject to change

The Paramedic Program prepares students to provide advanced emergency medical care to critically ill and injured patients in prehospital and emergency care settings. Building upon the foundational knowledge and skills acquired at the Emergency Medical Technician (EMT) level, students develop advanced competencies in patient assessment, airway and respiratory management, cardiac monitoring and resuscitation, pharmacology, medication administration, intravenous and intraosseous access, trauma management, medical emergencies, and care of special patient populations.

The program integrates classroom instruction, laboratory-based skill development, clinical experiences, and supervised field experiences to provide students with the knowledge, technical skills, and professional behaviors necessary to function as competent entry-level paramedics.

Program Goal

To prepare Paramedics who are competent in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains to enter the profession.

Certification Preparation

The program is designed to prepare students for the National Registry of Emergency Medical Technicians (NREMT) Paramedic certification examination and applicable State of Ohio certification requirements. Successful completion of the program does not guarantee certification, licensure, or employment.

Prerequisite for Enrollment

Successful completion of an Anatomy and Physiology course consisting of a minimum of 48 instructional hours is required prior to enrollment in the Paramedic Program. The course must provide foundational knowledge of human anatomy, physiology, body systems, and normal body function necessary for successful completion of advanced paramedic coursework.
